Blockquotes

Single line blockquote:

> Stay hungry. Stay foolish.

Multi line blockquote with a cite reference:

> The HTML `<blockquote>` Element (or *HTML Block Quotation Element*) indicates that the enclosed text is an extended quotation. Usually, this is rendered visually by indentation (see **Notes** for how to change it). A URL for the source of the quotation may be given using the cite attribute, while a text representation of the source can be given using the **`<cite>`** element.

multiple contributors – MDN HTML element reference – blockquote

Tables

Employee	Salary	
Jane	$1	Because that's all Steve Jobs needed for a salary.
John	$100K	For all the blogging he does.
Jane	$100M	Pictures are worth a thousand words, right? So Tom x 1,000.
Jane	$100B	With hair like that?! Enough said…

Definition Lists

Definition List Title
    Definition list division.
Startup
    A startup company or startup is a company or temporary organization designed to search
    for a repeatable and scalable business model.
#dowork
    Coined by Rob Dyrdek and his personal body guard Christopher "Big Black" Boykins, "Do
    Work" works as a self motivator, to motivating your friends.
Do It Live
    I'll let Bill O'Reilly will **explain** this one.

Unordered Lists (Nested)

    - List item one

        - List item one

        - List item two

        - List item three

        - List item four

    - List item two

    - List item three

- List item four
  - List item two
  - List item three
  - List item four

Ordered List (Nested)

8. List item one -start at 8

   a. List item one

      i. List item one -reversed attribute
      ii. List item two
      iii. List item three
      iv. List item four
   b. List item two
   c. List item three
   d. List item four
9. List item two
10. List item three
11. List item four

HTML Tags

These supported tags come from the WordPress.com code **FAQ**.

Address Tag

1 Infinite Loop
Cupertino, CA 95014
United States

Anchor Tag (aka. Link)

This is an example of a **link**.

Abbreviation Tag

The abbreviation srsly stands for "seriously".

Acronym Tag (*deprecated in HTML5*)

The acronym **ftw** stands for "for the win".

Big Tag (*deprecated in HTML5*)

These tests are a big deal, but this tag is no longer supported in HTML5.

Cite Tag

"Code is poetry." —Automattic

Code Tag

This tag styles blocks of code.
```
.post-title {
margin: 0 0 5px;
font-weight: bold;
font-size: 38px;
```

```
line-height: 1.2;
and here's a line of some really, really, really, really long text, just to see
how it is handled and to find out how it overflows;
}
```
You will learn later on in these tests that `word-wrap: break-word;` will be your best friend.

Delete Tag

This tag will let you ~~strike out text~~, but this tag is *recommended* supported in HTML5 (use the `<s>` instead).

Emphasize Tag

The emphasize tag should *italicize text*.

Horizontal Rule Tag

This sentence is following a `<hr />` tag.

Insert Tag

This tag should denote <u>inserted</u> text.

Keyboard Tag

This scarcely known tag emulates `keyboard text`, which is usually styled like the `<code>` tag.

Preformatted Tag

This tag is for preserving whitespace as typed, such as in poetry or ASCII art.

The Road Not Taken

```
Robert Frost

        Two roads diverged in a yellow wood,
        And sorry I could not travel both          (\_/)
        And be one traveler, long I stood         (='.'=)
        And looked down one as far as I could     (")_(")
        To where it bent in the undergrowth;

        Then took the other, as just as fair,
        And having perhaps the better claim,        |\_/|
        Because it was grassy and wanted wear;     / @ @ \
        Though as for that the passing there      ( > º < )
        Had worn them really about the same,       `>>x<<´
         /  O  \
        And both that morning equally lay
        In leaves no step had trodden black.
        Oh, I kept the first for another day!
        Yet knowing how way leads on to way,
        I doubted if I should ever come back.

        I shall be telling this with a sigh
        Somewhere ages and ages hence:
        Two roads diverged in a wood, and I—
        I took the one less traveled by,
        And that has made all the difference.

        and here's a line of some really, really, really, really long
   text, just to see how it is handled and to find out how it overflows;
```

Quote Tag for short, inline quotes

Developers, developers, developers… –Steve Ballmer

Strike Tag (*deprecated in HTML5*) and S Tag

This tag shows ~~strike-through text~~.

Small Tag

This tag shows smaller text.

Strong Tag

This tag shows bold text.

Subscript Tag

Getting our science styling on with H_2O, which should push the "2" down.

Superscript Tag

Still sticking with science and Albert Einstein's $E = MC^2$, which should lift the 2 up.

Teletype Tag (*obsolete in HTML5*)

This rarely used tag emulates `teletype text`, which is usually styled like the `<code>` tag.

Underline Tag *deprecated in HTML 4, re-introduced in HTML5 with other semantics*

This tag shows underlined text.

Variable Tag

This allows you to denote variables.
